4. Minnesota Statute 103I.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.
9. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.
14. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency or qualified professional which regulates wells for further information about these issues.

68. INSTRUCTIONS FOR COMPLETING THE WELL DISCLOSURE STATEMENT

69. **DEFINITION:** A “well” means an excavation that is drilled, cored, bored, washed, driven, dug, jetted or otherwise
70. constructed if the excavation is intended for the location, diversion, artificial recharge or acquisition of groundwater.

71. **MINNESOTA UNIQUE WELL NUMBER:** All new wells constructed AFTER January 1, 1975, should have been
72. assigned a Minnesota unique well number by the person constructing the well. If the well was constructed after this
73. date, you should have the unique well number in your property records. If you are unable to locate your unique well
74. number and the well was constructed AFTER January 1, 1975, contact your well contractor. If no unique well number
75. is available, please indicate the depth and year of construction for each well.

76. **WELL TYPE:** Use one of the following terms to describe the well type.

77. **WATER WELL:** A water well is any type of well used to extract groundwater for private or public use. Examples
78. of water wells are: domestic wells, drive-point wells, dug wells, remedial wells and municipal wells.

79. **IRRIGATION WELL:** An irrigation well is a well used to irrigate agricultural lands. These are typically
80. large-diameter wells connected to a large pressure distribution system.

81. **MONITORING WELL:** A monitoring well is a well used to monitor groundwater contamination. The well is
82. typically used to access groundwater for the extraction of samples.

83. **DEWATERING WELL:** A dewatering well is a well used to lower groundwater levels to allow for construction
84. or use of underground spaces.

85. **INDUSTRIAL/COMMERCIAL WELL:** An industrial/commercial well is a nonpotable well used to extract
86. groundwater for any nonpotable use, including groundwater thermal exchange wells (heat pumps and heat
87. loops).

88. **WELL USE STATUS:** Indicate the use status of each well. CHECK ONLY ONE (1) BOX PER WELL.

89. **IN USE:** A well is “in use” if the well is operated on a daily, regular or seasonal basis. A well in use includes
90. a well that operates for the purpose of irrigation, fire protection or emergency pumping.

91. **NOT IN USE:** A well is “not in use” if the well does not meet the definition of “in use” above and has not been
92. sealed by a licensed well contractor.

93. **SEALED:** A well is “sealed” if a licensed contractor has completely filled a well by pumping grout material
94. throughout the entire bore hole after removal of any obstructions from the well. A well is “capped” if it has
95. a metal or plastic cap or cover which is threaded, bolted or welded into the top of the well to prevent entry
96. into the well. A “capped” well is not a “sealed” well.

97. If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing
98. contractor, check the well status as “not in use.”

99. If you have any questions, please contact the Minnesota Department of Health, Well Management Section,
100. at (651) 201-4587 (metropolitan Minneapolis–St. Paul) or 1-800-383-9808 (greater Minnesota).
